Title:	FORMIN-2 NUCLEIC ACIDS AND POLYPEPTIDES AND USES THEREOF		

BOX MISSING PARTS

Assistant Commissioner for Patents
Washington, D.C. 20231

SUBMISSION OF SUBSTITUTE SPECIFICATION

Applicants submit herewith a substitute specification to replace the specification filed on April 12, 2001. The specification has been amended to add Sequence identifiers and to correct typographical errors. No new matter has been added by these amendments.

Applicants draw the Examiner's attention to Fig. 12D, which depicts the nucleotide sequence of human 3' EST encoding Fmn-2. This sequence is identical to the sequence of AF218924 available in Genebank on at the time of filing. Support for this amendment is found on page 39, line 12, of the original specification.

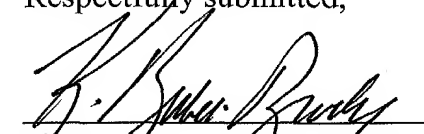

Applicants also submit herewith a marked-up version of the specification showing changes made.

If there are any charges, or any credits, please apply them to Deposit Account No. 03-2095.

Respectfully submitted,

Date:

October 9, 2001

Kristina Bieker Brady, Ph.D.
